Grizzlies meet Trojans in Thanksgiving classic

Both teams are evenly matched although the Trojans hold a 10-pound advantage in the line and a two-pound edge in the backfield. For the Trojans, Cooney and Schmer will carry the brunt of their offensive attack along with right end Skomski.

Our boys are in good shape for this game and will be hard to beat," says Grizzly head coach Steel White, who is hoping for a win over the Trojans.

Another big factor in the Bruin chances for a victory is the return of the Grizzlies’ leading scorer, Joe Paul Albert. He should be back in full strength at his left halfback position since he has been limited action in the last few games.

Each team has a similar offense, as the Bruins run off a split T, while the Sublico offense has been known to use the split T and splitting T along with a variation of the TCU spread. This game should turn out to be a free-scoring fray because both teams have excellent passers, and aerial play might be the difference in the final score. However, the Bears should be the stronger of the two in the ground game.

Basketball season takes over soon

Basketball practice will begin just as soon as football season ends according to Coach "Ace" Parker. First home game of the basketball season for the Grizzlies will be against Muncie here December 17.

All home games this year will be played in the new gym at Ramsey Junior High School.

One of the reasons basketball practice has to wait until after the football season is that many players participate in both sports. The football players have to condition their legs for the turn from gridiron to the hardwood floor," Coach Parker said.
